Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 23, drawn to a method of targeting a heritable integration of a transgene within the genome of an invertebrate using a DNA cassette comprising flanking transposon half sides and an internal transposon half side and the invertebrate organism.

Group II, claim(s) 11-22 and 24, drawn to a method of targeting a heritable integration of a transgene within the genome of an invertebrate comprising exchanging a first DNA cassette comprising a mutated or non-mutated target site for a site-specific recombinase at one end and a mutated target site at the other end for a second DNA cassette by a site-specific recombinase that catalyzes recombination via homospecific recombinase target sites and the invertebrate organism.

Group III, claim(s) 25-34 and 47, drawn to a method of targeting a heritable integration of a transgene within the genome of a vertebrate using a DNA cassette comprising flanking transposon half sides and an internal transposon half side and the vertebrate organism.

Group IV, claim(s) 35-46 and 48, drawn to a method of targeting a heritable integration of a transgene within the genome of a vertebrate comprising exchanging a first DNA cassette comprising a mutated or non-mutated target site for a site-specific recombinase at one end and a mutated target site at the other end for a second DNA cassette by a site-specific recombinase that catalyzes recombination via homospecific recombinase target sites and the vertebrate organism.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

PCT Rule 13.2 requires that unity of invention exists only when there is a shared or corresponding technical feature among the claimed inventions. Applicant's claims encompass multiple inventions and do not have a special technical feature which link the inventions one to Art Unit: 1632

the other, and lack unity of invention. Groups I and IIII are directed to use of a DNA cassette comprising flanking transposon half sides and an internal transposon half side. Groups II and IV

are directed to use of a method of targeting a heritable integration of a transgene within the

genome of a vertebrate comprising exchanging a first DNA cassette comprising a mutated or

non-mutated target site for a site-specific recombinase at one end and a mutated target site at the

other end for a second DNA cassette by a site-specific recombinase that catalyzes recombination

via homospecific recombinase target sites. Groups I and II are directed to invertebrates. Groups

II and IV are directed to vertebrates.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

Application/Control Number: 10/534,226

Art Unit: 1632

currently named inventors is no longer an inventor of at least one claim remaining in the

application. Any amendment of inventorship must be accompanied by a request under 37 CFR

1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the

Page 4

examiner should be directed to Valarie Bertoglio whose telephone number is (571) 272-0725.

The examiner can normally be reached on Mon-Thurs 5:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Peter Paras can be reached on (571) 272-4517. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
